

OVERNIGHTS AT THE MUSEUM

Enjoy a fun-filled experience the family will never forget, including hands-on science and crafts, a night-time snack and breakfast, and access to all the Museum's exhibits!

2018-2019 CAMP-INS

ASTRONOMY

November 17-18, 2018 | April 6-7, 2019 | Ages 6-12

This Camp-In is sure to be out of this world! Campers will learn how a telescope works and will take a trip into our inflatable planetarium to learn how to identify constellations and listen to the myths behind them.

SUPER SCIENTIST

December 8-9, 2018 | February 9-10, 2019 | Ages 6-12

If you like to mix things together and make observations to figure out why things happen - you'll love Super Scientist! You'll use your scientist skills to: make something yummy to eat and play with, explore buoyancy and color, create static electricity and a bubbly chemical reaction.

CRIME INVESTIGATION

January 26-27, 2019 | March 2-3, 2019 | Ages 6-12

Spend the night at the Museum and help investigate a mystery while gaining an understanding of how police officers and scientists solve crimes. Activities include: learning how to identify and lift fingerprints, understanding how the makeup of a marker's color can help identify which marker a suspect used to write a note and analyzing similar looking substances to determine which one was part of the crime.

GIRL SCOUT SPACE SCIENCE

May 3-4, 2019 | Ages 6-12

Reach for the stars as you engage in hands-on activities that will enable you to earn your Space Science badge while gaining an understanding on how large our solar system is. Scouts will learn: how a telescope works, the phases of the Moon, how to identify constellations while listening to some star stories.
